

# Keep It Clean: Scoop the Scene

**PLEASE DISPOSE OF YOUR PET WASTE**

## Why is this important?

**Helps Stormwater Systems:** Keeping pet waste out of storm drains helps the city manage stormwater more effectively.

**Prevents Water Pollution:** Pet waste can wash into storm drains and pollute rivers, lakes, and streams.

**Stops Algae Growth:** Waste adds nutrients to water, causing too much algae, which harms fish and other aquatic life.

**Protects Health:** Pet waste contains harmful germs that can make people and animals sick if it gets into the water.

**Keeps Areas Clean:** Cleaning up pet waste keeps parks and trails clean and safe for everyone to enjoy.

**Protects Wildlife:** Clean water is essential for the health of fish, birds, and other animals.

**Encourages Good Behavior:** Picking up pet waste sets a good example for others in the community.
